

Speedy
High production packing machine for rolls

Made in ITALY since 1969

Speedy

High production packing machine for rolls

Modular packing machine, suitable for high production, consisting in two or more stations to improve the final performance. The Mod. Speedy can work as a standing alone machine or on line with inspection machines.

PRODUCTION: UP TO 4 ROLLS/MIN

ROLLS ENTRY:

MANUAL OR AUTOMATIC

(accumulation table, conveyors in line with inspection machines)

BENEFITS:

- Film saving thanks to the precise calculation of the diameter and width of the roll
- Adherent packing suitable for export
- Packing with more plastic layers (1-2-3 turns)
- Packing with different coverings, even combined together (ex. polythene, paper, bubble polythene)
- CE certification
- Tele-assistance service via remote

OPTIONALS:

- ✓ Double automatic polythene feeding according to the width of the roll
- ✓ Automatic cutting of the exceeding lateral plastic film
- ✓ Introduction of an instruction sheet into the roll before packing
- ✓ Weighing
- ✓ Automatic or manual bar code reader
- ✓ Automatic labelling of the roll (internal or external; on the body or on the side)
- ✓ Automatic Palletizing System
- ✓ Automatic segregation of the rolls after packing in different destinations
- ✓ Real-time data exchange with the host

CLOSING ROLLS:

Longitudinal Closing:

- Thermowelding or Hot Melt System

Lateral Closing:

- Hot air shrinking
- Thermowelding sealing
- Ultrasonic Sealing
